

Telegenetics Training Opportunity

The Western States and Heartland Regional Genetics Collaboratives have worked with the Telehealth Resource Centers to develop and implement a telegenetics training program to introduce practicing and student genetic counselors to using telegenetics in your practice.

The program includes:

- 1) Ten self-paced on-line modules (average 15 minutes each)*
- 2) Two live webinars*
- 3) A one day in-person, hands-on training*

***If you are accepted, there is no cost to participate in this training.
CEUs are provided.***

***(Preference is given to genetic counselors working in or planning to work in
Alaska, California, Hawaii, Idaho, Oregon, and Washington)***

**The next in-person training date is April 3, 2017 in Tucson, AZ
Applications are due by February 10, 2017**

Telehealth is an important part of healthcare reform with increasing recognition and reimbursement. It is also a good tool to increase access to genetic services and education nationwide.

Interested in becoming a leader in telegenetics?
